

NOTICE

The Canadian Red Cross has issued an urgent appeal to all branches for woollen blankets for use at clearing stations and in hospitals in France. Blankets must not be stained or threadbare. Flannelette blankets must be of wool. All residents, members and others of this district are urgently requested to look over their supply and if any to spare toward this urgent appeal please deliver immediately to Mr. E. H. Targett at the C. N. R. depot.

Miss Chrissie Coutts will practise teaching for two weeks at the Langford School, south of town.

LOCAL NEWS

Mr. Vic Lawrence left on Saturday for Ontario where he will visit with relatives.

Miss Chrissie Coutts who has been attending Normal School in Calgary, returned home Wednesday night.

Mr. Jim Marcy of Brooks is renewing old acquaintances in the village this week.

Mr. W. Lawrence who has been visiting in the district for two weeks returned to Calgary on Saturday.

Mr. Doug Hawks of Calgary was a Chinook visitor on Monday.

These Mean More Than Thrift

War savings Certificates

The Government could have called them "National Safety Certificates."

For that, in stark truth, is what they are. War Savings Certificates are what, in peace days, we might call a "fine investment." They make for thrift, lay a foundation of security, appeal to the spirit of self respect and self reliance. On these grounds, as well as upon the grounds of democratic responsibility, of a wider devotion to the democratic creed of voluntary citizenship, they meet a need.

But, far more than these things, and more terribly vital War Savings Certificates are a challenge to patriotism. They are a call to all of us, and provide the means for all of us, to answer the challenge of war service; a dictate of war duty which no one can ever expect to be forgiven for ignoring.

War Savings Certificates are OUR share in this war. They ask us whether, in this terrible conflict, with all that we are or ever hope to be at stake, we are content with lip loyalty to our cause; content with abuse of Hitler; unwilling to make even moderate sacrifice for the sake of all our future.

In war-rocked France today the soldiers of democracy are dying for its defence. Are

we willing to back them up? To deny ourselves things we can yield for their sakes? Are we willing to contribute something to feed and arm them, to sustain their strength, to tell them back at home their peoples are supporting them?

This . . . this above all else . . . is the challenge of War Savings Certificates.

Over in England across the seas men and women and little children, workers and farmers, old and young, rich and poor, humble and obscure are yielding their all for victory. Giving in taxes, subscribing to loans, buying war savings certificates, they are giving a testimony of devotion to democracy and liberty as noble as anything that history has seen. It is for us here in Canada to show whether such devotion is ours, whether democracy and freedom mean as much to us as it does to them.

Let us in these coming weeks give proof of such devotion. Let us make this War Savings Certificates campaign a crusade; telling our Government and men on land and sea and in the air that we fight behind them. It is the least, God knows, that we can do.

Chinook Sports Day Big Success

The Chinook Athletic Association held a very successful Sports Day in Chinook on Wednesday, June 5th, 1940.

Five teams competed in the open baseball tournament, seven teams in the Ladies softball and three teams in the Junior Boys' softball tournament. Races were held for children up to 16 years of age, which were well attended and enjoyed by all.

The sports program was completed by a horse shoe tournament, and a largely attended dance in the evening rounded off a perfect day of

Mr. Gus Cook who has been employed at Hanna is spending a few days with his family.

The Ladies Card Club Met

The Ladies Card Club was held at the home of Mrs. W. Wilson, Bridge honors going to Mrs. W. Gallagher and Mrs. L. Robinson. The hostess next week will be Mrs. L. Robinson.

enjoyment for all concerned. Results of all sports day events will be published in this paper next week.

FOREIGN EXCHANGE ACQUISITION ORDER

SPECIAL NOTICE

Subject to certain exemptions, the Foreign Exchange Acquisition Order requires every resident of Canada who had any foreign currency or foreign currency deposit in his possession, ownership or control on May 1st, 1940, regardless of amount, to sell the same to an Authorized Dealer (chartered bank) on or before May 31st, 1940.

Unless an extension has been granted by the Board, any resident who has not complied with the terms of the Order on or before May 31st, 1940, will be in default and subject to the penalties provided in the Order.

The Order does not require the sale of foreign securities.

Further information and particulars may be obtained from any branch of a chartered bank.

GROWN IN SUNNY SOUTHERN ONTARIO

The Mighty Atom

One can imagine with what dismay producers of power of all kinds and from all sources must have read the recent announcement from New York of the isolation in a laboratory workshop of a new chemical substance, one pound of which, to quote newspaper despatches, "is said to be capable of yielding the power output of 5,000,000 pounds of coal or 3,000,000 gallons of gasoline."

Significant, indeed, of the potential destructive power and the use to which it might be put by the Germans, if they can perfect it, is the name which has been given it—the "U-235". If that were not sufficient to arouse dread, the New York Times, which first announced the discovery, declared that the German government was aware of the research in this field being carried on in the United States and has instructed all its greatest scientists to concentrate on the problem of improving the process, "one pound of which is stated to have the explosive force of 15,000 tons of TNT." The German scientists in this field have been told to drop all other work and devote themselves to this task alone, says the New York paper.

Simple, too, is the method of application of U-235 to the process of developing power. All that is necessary is to immerse some of the new isotope in cool water when it will release energy in the form of steam. The process is akin to the generation of acetylene gas. As long as water makes contact with U-235 it will develop steam and all that is necessary to stop it is to cut off the supply of water.

For Good Or Evil

While the substance, U-235 has been discovered for some time, it is only quite recently that scientists became aware of its immense possibilities for good or evil, according to the purpose to which it may be put. As the story goes, it was in February that a professor in the University of Minnesota, was successful in isolating "a minute fraction of a gram" and subsequently a professor at the University of Columbia subjected it to tests with an atom smashing machine. Since then the yield has been increased 200-fold, indicative of possibilities that a process for isolating the substance in large quantities may soon be found.

The immense commercial and industrial as well as a warfare potentialities of the U-235 can be sensed from the statement that five to ten pounds of the substance, plentifully available in many parts of the earth, is capable of driving a battleship or a passenger liner around the oceans "for an indefinite period without refuelling."

While the destructive use of such a substance as U-235, when used as a weapon of war would be so terrific as to beggar description and its holocaustic effects are almost beyond the imagination of man, its use in the arts of peace would be so beneficial to mankind as to be revolutionary. It is true that if a process can be discovered which will enable the substance to be isolated in large quantities and cheaply, it would ruin many industries and destroy an enormous amount of capital invested in such industries as coal and petroleum. On the other hand it would make available to man a cheap source of power, almost akin to perpetual motion.

Applied to peace time purposes one can visualize a family setting out for a trip around the world in a steam driven automobile with a full supply of power for the entire trip in something less than a pound package in the trunk or under the back seat of the car. All that would be necessary to keep moving would be to occasionally renew a small tank of water at ordinary temperature. Gone would be the necessity of stopping every 200 or 300 miles to instruct a gasoline station attendant to "fill 'er up".

Might Destroy Civilization

But when and if such a force, if available in quantity, were applied to the work of destruction as exemplified in the kind of warfare being waged by Germany against the Allies, the results would be too terrible to contemplate. They might be expected to rival the oft-related but mythical death ray.

In view of the ruthlessness of the Hitlerian method of conducting war on mass scale against open cities, and the German policy of slaughtering innocent women and children on wholesale scale, and of wiping out densely populated civilian areas by the square mile, it is not surprising to hear that the German military machine is interesting itself in the new discovery and that the scientists of that nation have been ordered to drop everything else in the interest of further development of U-235.

In the interests of humanity and of the very existence of civilization it is to be devoutly hoped that the development of U-235 as a practical and feasible source of power will be stayed until the Allied arms have prevailed and the world has once again been made safe for the peace-loving nations of the globe.

God forbid that the mighty atom should be used to destroy democracy.

Bacteriological Research

Bacteriological research in the general field of agriculture and the related industries is now having many important applications. Bacteriology was developed first in connection with human medicine, and in spite of the fact that out of the hundreds of species of bacteria known to science only a very few are recognized as causing disease, bacteriology is still connected in the lay of the Canadian flora.—Dr. J. M. Swaine, Director, Science Service, Dominion Department of Agriculture.

Although the feathers of stilts may be either white or black, their skin always is black. They are the Negroes among fowl.

Does Not Use Them

Germany Has Never Made Anything Out Of Her Colonies

The idea of a poverty-stricken and over-populated Germany was opposed by Dr. E. G. Plewa, a geographer of the University of Western Ontario, when he spoke at a dinner meeting of the Lions Club at Stratford, Ont. Dr. Plewa declared that a myth had grown up that Germany was over-populated. It was not a question of the number of people to the square mile, but a matter of how many people to the square mile that a country could support. Germany, with a population of 366 to the square mile, had stressed the over-population claim so long and steadily that it had come to be an accepted fact despite the facts. Germany moved to take over two countries, Holland and Belgium, that were about twice as densely populated.

After asking whether Germany ever thought of Canada, the speaker declared that one of the best surveys ever made of Southwestern Ontario was made in 1922 by a German geographer from the University of Kiel, and he doubted that it was a coincidence that this same geographer turned out afterwards to be a high ranking official in the German army.

The idea that the Germans were good colonizers had been exploded. They did not do anything to their colonies when they had them. German immigrants did not go to German colonies. Figures had shown that an average of some 33 persons, or eight families a year had migrated from Germany to her colonies.

SELECTED RECIPES

MAKE IT BRANBURGER

Like a guard of honor, trusty branburgers are ready to do their duty at the picnic lunch. Each one is bound in its own strip of bacon, skewered and wrapped in gay wax paper. Everything done but the cooking—and what better place to do that than "on the spot." Cooked over the open fire, "Burgers" take first place in appetite satisfaction after a day's outing—and the best content sets a new high in taste delight and economy. That jar in the lunch basket contains the Spanish Sauce. It will add a continental flavor to your branburgers.

Branburgers

1 egg
1 1/2 teaspoons salt
3/4 teaspoon pepper
1 1/2 cups milk
1 cup all-bran
1 lb. ground round steak
2 tablespoons finely chopped onion
1 tablespoon chopped parsley
10 slices bacon

Beat egg and add salt, pepper, milk and all-bran. Combine meat with onion and parsley. Add the soaked bran and mix well. Form into cakes about two inches in diameter and one inch thick. Wrap slice of bacon around each cake and fasten with skewer. Bake in hot oven (450 degrees F.) for 30 minutes or broil for 20 minutes. Serve with Spanish sauce. Yield: Five servings.

Note: Half cup grated cheese may be sprinkled over top of Branburgers before the last ten minutes of cooking.

Spanish Sauce

1 1/2 cups sliced onion
3 tablespoons fat
1/2 cup chopped green pepper
2 cups canned tomatoes
1 1/2 teaspoons salt
1/2 teaspoon pepper
2 teaspoons Worcestershire sauce
1 cup stuffed whole olives
Brown onions lightly in the fat. Add green pepper, tomatoes and seasonings. Simmer until mixture thickens, stir in olives and heat thoroughly. Yield: Three cups sauce.

Idea Under Consideration

Manitoba Government Plans Trapping Of Muskrats To Help Industry

Trapping of a million and a half muskrats annually in the Saskatchewan River delta area may be made possible by a 10-year program of development under consideration by the Manitoba government.

Premier John Bracken states that such an industry would provide a payroll for the community adjacent to the Pas exceeding \$2,000,000 a year. "Five years ago there were practically no muskrats in this area. It is now estimated that as a result of the conservation work done, the rat population before present trapping started was 300,000," states Mr. Bracken.

Was Once A Joke

How Process Of Inside Freezing Of Electric Light Bulbs Started

The Christian Science Monitor carries an interesting story on how the process of frosting electric light bulbs on the inside was discovered. The problem was a "gag" piece of research assigned new apprentices in one big electrical equipment company. One researcher failed to realize that he was being kidded, and turned up with a process which not only did the trick but added materially to the finished bulb's strength.

Ask for BEE HIVE

An Ingenious Pilot

Used Chewing Gum To Repair Holes In Airplane Engine

How a flight lieutenant patched two bullet holes in his engine with chewing gum after being forced down by six German fighters, and got back to his command, was told by the British air ministry.

The aviator was attacked, said the statement, over eastern Belgium in the early days of the German push, and landed in a field.

With the help of peasants, he covered the plane with branches to camouflage it, and German bombers passed over without spotting him. His plane was undamaged except for two small holes in the engine. At the nearest town he bought gasoline and a package of chewing gum.

"I chewed that gum for a bit to get it tacky and then plugged the holes," he said. "It set very well, I got oil and petrol put in, took off, and so came home."

Not Affected By Change

Salariat Cat At No. 10 Downing Street Stays On

When Mr. and Mrs. Neville Chamberlain, after three years' residence at No. 10 Downing street, moved out to make way for Prime Minister Winston Churchill, they took the family bird bath along with them.

Promoted from Chancellor of the Exchequer to Premier, in May, 1937, Chamberlain made sure that the bath followed him from No. 11 Downing street, traditional home of the treasury chief, to the garden of No. 10. It has now been moved to a private house, since Chamberlain, as Lord President of the Privy Council, does not rate an official residence.

Bob, the salariat Downing street cat, who can claim as direct ancestor an animal owned by Cardinal Wolsey, is not affected by the cabinet shake-up.

New York City's population has multiplied 150 times since 1790. The population of the United States, as a whole, has multiplied only 32 times in the same period.

Vast Picture Crowds

Movie Audiences In United States Run Into Millions

Wondering at the size of motion-picture audiences at this late day is almost like trying to decide whether the automobile has a place in modern life. Nevertheless, there is a fillip for the imagination in the thought of something like 900,000 persons witnessing the same screen play in a single theatre in the space of six weeks, even if the theatre is the largest of its kind in the largest city in the United States.

Something between eighty million and ninety million people go every week to the pictures in this country. In the course of six weeks this means half a billion patrons, about four times the present population of the country, a truly stupendous figure. But for a moment the specific number of 20,000 people a day, day after day to the pictures in a single theatre is actually the more impressive.—New York Times.

Had Something To Say

Pompous Orator Had Great Opinion Of His Radio Address

Malcolm W. Bingley, in the Detroit Free Press, said years ago, when the radio was young, there was one of these civic outbursts of some kind in Detroit. A pompous orator of the old school was scheduled to make the speech of the day. He was all a twitter because it was to be a broadcast. He asked me if I would read his address to make sure that it was of the type that would go over the air. I did not have to read it; all I had to do was hear it. He had written a volume.

"This, my dear sir," I told him, "would take an hour to read even if I were cut in half. And you have only 15 minutes before the microphone."

He was stunned. "I can't," he insisted, "reduce this down to 15 minutes."

"Lincoln took only 110 words for his Gettysburg Address," I reminded him.

"I know that," he spluttered, "but then, damn it all, don't you see, I have something to say!"

Old-Fashioned Spelling Bee

Was Good Discipline With Plenty Of Fun Thrown In

The Guelph, Ont., Mercury, says: It is probably true that our grandparents were better spellers than we are. They were drilled in the old-fashioned way, being obliged to stand up and spell before the whole school. "Headmarks in spelling classes those days, and if a boy or girl spelt 'hemorrhage' with one 'r' the chances were they never forgot that is not the way to spell it. The old-fashioned spelling bee has much to commend it. It is good discipline with a lot of fun to boot.

New 'Plane Detector

A secret, supersensitive airplane detector which pierces all fog and darkness to give defending fighters a vital, 15-minute warning of approaching enemy aircraft has been perfected by the United States army for a chain of coastal lookout stations.

Get \$1.00 for Your OLD IRON on a NEW Coleman Self Heating Iron

Hardware dealers are authorized to allow you \$1.00 on any old iron toward the purchase of a new Coleman. It makes and burns own gas. No cords, wires. Lights instantly. SEE YOUR DEALER or write to THE COLEMAN LAMP & STOVE CO., LTD. Dept. WN.327 TORONTO, CANADA (5227)

Record Gypsum Production

Deposits Are Found In Many Sections Of Canada

Gypsum production in Canada set an all-time tonnage record in 1939, when the output amounted to 1,408,188 tons valued at \$1,922,907, as against 1,068,790 tons valued at \$1,562,265 in 1938, according to the Department of Mines and Resources, Ottawa.

Canada ranked fifth among the world's gypsum producers during 1939, contributing 8 per cent of the world production and 38 per cent of that of the British Empire. The Dominion is fortunate in having extensive deposits of excellent grade gypsum, favourably situated for commercial exploitation. Nova Scotia is the largest producer, and is followed by Ontario, New Brunswick, Manitoba, and British Columbia. The materials produced are the hydrous calcium sulphate, commonly known as gypsum, the partly dehydrated material known as plaster of Paris, or wall plaster, and the anhydrous calcium sulphate known as anhydrite.

Plaster of Paris is the Canadian production of anhydrite was exported principally for use as a fertilizer for the peanut crop in the Atlantic seaboard states of the southern United States, but there has since been an increasing market for this material in England, where it is used for the manufacture of sulphuric acid, ammonium sulphate, cement and special plasters.

Owing to the war, overseas shipments have been curtailed, but it is possible that an industry will be started in Canada in which anhydrite will be used in the manufacture of products similar to those being marketed in England.

The use of gypsum products in the building trades has made rapid progress in recent years because of their lightness, durability, fire-resisting, insulating and acoustic properties. Tiles, wallboard, block, and special insulating and acoustic plasters have been developed.

Efficiency experts say that happy staffs do more and better work than those working under bullying or nagging supervisors. Nearly half of the working time of unhappy staffs is wasted, they claim.

England imports more eggs than the rest of the world combined. Its main sources of supply are Australia, China, Denmark, Ireland and the Netherlands.

Copyright, by Edgar Wallace. Serialized by Ledger Syndicate.

CHAPTER V.—Continued

No Followers

Once or twice he had looked at his watch, a little furtively, she thought, yet it seemed that he was prepared to break any appointment he had made, for he lingered over his coffee until she brought a happy evening to an abrupt close by putting on her gloves. As they were driving back to her lodgings:

"I haven't asked you very much about yourself. That is the kind of impertinence which really scares me," he said, but I gather that you're an unmarried lady—and unengaged?" he asked suggestively.

"I have no followers," she said without embarrassment, "and I hope that confession will offer no encouragement to the philandering constabulary."

He chuckled for fully a minute. "That's good," he said at last. "Philandering constabulary" taken into use for special occasions. You're the first woman—

"Don't!" she warned him. "I've ever met with a real sense of humor," he concluded. "I'm sorry to disappoint you."

"I wasn't disappointed. I expected something banal," she said. "My house is the third on the left * * * thank you."

She got down without assistance and offered her hand, and as he looked past her toward the door of the house:

"The number is 163," she said, "but you needn't write unless you've something very policy to write about. Good night!"

Jim Carlton was smiling all the way to Whitehall Gardens, and that flicking sense of amusement still held when he followed the footman into Sir Joseph Layton's study.

The words "Joseph Layton" are familiar to all who carry passports, for he was the Foreign Secretary, a man of slight figure and ascetic face, and possibly the most cartooned politician in Britain.

He looked up over his big-horned pince-nez as Jim came in with a little bow.

"Sit down, Carlton," he blotted the letter he had been writing, inserted it with punctilious care into an envelope, and addressed it with a flourish before he spoke.

"I've just come back from the House. Did you call before?"

"No, sir."

"Humph!"

He settled himself more easily in his padded chair, put the tips of his fingers together and again scrutinized the detective over his pince-nez. "Well, what are the developments?" he asked, and added: "I've seen the cables you sent me. Curious—very curious indeed. You intercepted them?"

Prepared For A Killing

"Some of them, sir," said Jim. "A great deal of the correspondence of the Rata Syndicate goes through other channels. But there's enough there to show that Rata is preparing for a big killing. I should imagine that every big brokerage house in the world has received similar instructions."

Sir Joseph unlocked a drawer of his desk, and, pulling it open, took out a number of sheets of paper fastened together by a big brass clip. He turned the leaves slowly.

"I suppose this one is typical," he said.

"DERPO" BUG KILLER 85c. Extenuates killers, moths, cockroaches, crickets, flies, ticks, beetles, etc. RATA and MOUSE KILLER 85c. Harmless to humans, animals, fowl. At Eatons, Simpsons, local dealers or Derpo Products, Toronto.

YOU'LL LOVE THESE!

A Master Strategist

Is What Fellow Officers Call Britain's New Army Chief

The new British Imperial staff commander is said once to have had a price of \$2,000 on his head.

For the rebellious Arab chieftain who offered the prize, \$2,000 was probably a lot of money, so he wasn't under-estimating the value of General Sir John Greer Dill, then supreme commander of the British military forces in Palestine. General Dill's reputation for energy and quick decisions had preceded him to the Near East in 1936.

The story may be doubtful, but in any case it's still told in British army circles and it serves to illustrate the character of the man chosen to replace General Sir Edmund Ironside as head of Britain's army and her chief strategist.

He's an Ulsterman, born 58 years ago on Christmas Day. He studied at Cheltenham college and at Sandhurst and entered the army in 1901. While serving against the Boers in South Africa, he won the Queen's medal with five clasps.

A tall, well-made man, with trim moustache and smiling eyes he became a captain in 1911, a major in 1914. He served in the last war and was decorated with the Distinguished Service Order for bravery.

He became a colonel in 1920, a major-general in 1930 and a lieutenant-general in April, 1936. After the last war he commanded the second infantry brigade, had two years as army instructor at the Imperial defence college, and was later commander of the staff college at Camberley.

He also served one year in India as principal staff officer at Quetta. Fellow officers have described him as one of the most brilliant men in the British army and a master strategist. For a time he was director-general of military operations and intelligence, serving in that capacity from 1934 to 1936 when he resigned to take supreme command in Palestine. He remained there for one year.

A Brave Spirit

Story Of A French Aviator Who Died On The Field Of Honor

The big guns and the heavy bombs have not yet robbed war of its glamor. That has been demonstrated by the story of Albert, the French aviator, which Robert J. Casey has been reporting from Luxembourg and which he concluded with the report: "died on the field of honor."

Almost since the beginning of the war, the insouciant Albert had been flying down the Moselle Valley with the regularity of a clock to pepper at the German anti-aircraft gunners and to try to scrape the German sentries off the bridge-heads with the wheels of his plane.

In this one man, going out alone in his little plane against the whole of Hitler's host the Luxembourgians saw some knight of old-on his horse, some champion riding alone into the lists. Here was a Roland or an Oliver, a duc Guesclin or a Bayard—a bright spirit marked for slaughter—St. Louis Post-Dispatch.

R.C.A.F. Gets Yacht

As a contribution to Canada's war effort, J. Harold Crang, prominent Toronto broker, has placed his 38-foot motor yacht, "Haida", at the disposal of the Royal Canadian Air Force to be used for rescue work, for which her speed and design are specially suited. Honourable C. D. Howe, Minister of Munitions and Supply, accepted the offer on behalf of the Government.

Pasture Fenced In

A wire fence extending from Calgary to Montreal requires some effort to visualize: The pasture lands enclosed under the plans of the Prairie Farm Rehabilitation Act require that length of fence for the 1,000,000 acres included.

—The Daily Herald, London.

Others Have Tried It

Russian Woman Anarchist Found She Could Not Renako World

The death of "Red Emma" Goldman was not an event, as Tallyrand said of the death of the exiled Napoleon. It was merely news. And not very exciting news at that.

Yet a half-century ago "Red Emma" and her anarchist propaganda scared many Americans nearly out of their wits. They really feared that a handful of wild-eyed anarchists would overthrow American democracy.

When death came to "Red Emma" in Toronto she was just a fat disillusioned old woman, whom age had mellowed. She had revisited her native Russia, after the Communists took it over, and had been disgusted with the conditions she found there. She spent her last years in capitalist countries. She had been beaten by realities. She was only one of many, many who tried to make this old world over, found it too big a job for them, and submitted to the inevitable.—Detroit Free Press.

Canteen For Polish Army

Englishwoman Will Cater To Them Solely In France

Lady Warrender, wife of the Financial Secretary to the Admiralty, is going to France shortly with two mobile canteens, which she has organized just for the soldiers of the rebuilt Polish Army since there is already a fleet of canteens operating with the B.E.F., says an item in the Toronto Telegram. The Poles will be able to get anything from soap and razor blades to chocolate bars, and hot drinks like tea will also be served. Lady Warrender got her canteens under way when she realized the Polish soldiers got very poor pay and cannot afford to buy things from the shops. Every article she carries will be priced very cheaply.

Manitoba Red Cross Society

Makes Another Big Shipment Of Supplies To Great Britain

May 14th another 35 big cases were forwarded containing supplies to the value of \$14,688.77 and comprising the following: 1,344 abdominal bandages, 312 bed sheets, 924 triangular bandages, 120 dressing gowns, 41 pyjamas, 2,160 face cloths.

HOME SERVICE

SHORTHAND HOME COURSE STEP TO WELL-PAID JOBS

Study in Your Spare Time

Clever girl! Instead of wasting her spare time she used it to teach herself shorthand. Now she's the proud possessor of an excellent position.

Shorthand isn't difficult. You can learn it in simple home lessons. Then when an opportunity comes you're trained, ready to step in with an advantage over unskilled workers.

In Pitman shorthand, you write symbols based on the sounds of words, instead of their spelling. The word "pay", you learn, is a light slanting stroke followed by a heavy dot. "Say" is a light curve and a dot.

There aren't many sounds in the language, so you soon master the symbols. And for common phrases like "in order that" as soon as you have abbreviated time-saving symbols, easy to learn.

Then for regular practice each day—with someone dictating to you, slowly at first. Before you know it you'll be taking real office-speed dictation.

Fit yourself for a well-paid job. Our new 32-page booklet gives the essentials of the famous Pitman system in easy step-by-step lessons. Includes exercises, abbreviated symbols for words and phrases; pointers on acquiring speed, accuracy.

Send 15c in coins for your copy of "Shorthand" to Home Service Dept., Winnipeg News-Week Union, 175 McDermott Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each: 184—"Develop Correct Tennis Form." 182—"How To Give Beauty Treatments." 180—"What You Should Know About Nursing." 174—"How To Be a Good Swimmer." 171—"How to Plant and Care for Your Garden." 146—"Home Course in New Ballroom Dances."

U.S. Examines Recruits

Will Determine The Mental Fitness For Men At Enlistment

Many potential deserters and shell-shock victims will be eliminated from the United States emergency army before they ever don a uniform.

The American Psychiatric Association was told by its president, Dr. William Sandy, of Harrisburg, Pa., of plans to examine every recruit on his nerve as well as his physical capability.

He declared a military questionnaire is being circulated among psychiatrists, having as its objective "preparation for meeting the requirements of any national emergency."

The association, he said, is seeking to have trained psychiatrists available at every station to assist other medical examiners in determining the mental fitness of recruits.

Under the plan it would no longer be possible for adventurous boys to slip their way into a uniform or for cases to pass examination and later become wards of the government.

GEMS OF THOUGHT

TRANQUILITY

What sweet delight a quiet life affords.—Drummond.

I have often said that all the misfortunes of men spring from their not knowing how to live quietly at home, in their own rooms.—Pascal.

The heart that is to be filled to the brim with holy joy must be held still.—Bowe.

To preserve a long course of years still and uniform, amid the uniform darkness of storm and cloud and tempest, requires strength from above—deft draughts from the fount of divine Love.—Mary Baker Eddy.

And the work of righteousness shall be peace; and the effect of righteousness quietness and assurance for ever.—Old Testament: Isaiah 32:17.

Serene will be our days and bright. And happy will our nature be, When love is an unerring light, And joy its own security.

—William Wordsworth.

Everything Is At Stake

Liberty Would Be Empty Word If Allies Lost War

The issues have become ever bigger than any question of colonies or of righting the injustices of the Versailles Treaty. There is at stake the right to live the Christianity upon which men's lives must be based, else they perish. The challenge to Christianity is being made on more than one front, but in this period it appears to be receiving its chief impetus by an attempt to overthrow the Nazarene's love-inspiring doctrines through the forceful application of hatred-breeding Nazi dogmas. For the brotherhood of man is openly scorned. Worship of person and state are given precedence over worship of God. The rights of peoples and nations to freedom of speech, religion, and self-government are denied. Unjustified, unprovoked attacks have been made on innocent countries and peoples, and their morale weakened through racial treachery.—Christian Science Monitor.

Thirty Years Of Service

Chauffeur To Late Lord Tweedsmuir Dies In England

Word was received at Government House, Ottawa, of the death at Epsom, Oxfordshire, England, of Amos Webb, for 30 years chauffeur to the late Lord Tweedsmuir. Webb came to Canada in 1935 when Lord Tweedsmuir was appointed Governor-General. He suffered a stroke on the same day Lord Tweedsmuir became ill, but recovered enough to accompany Lady Tweedsmuir back to England in March.

Generosity For Troops When the news got out that a certain unit of the C.A.S.F. in the Ottawa area was in need of a piano for recreational purposes, the response was quick; five citizens immediately offered their pianos to the troops for the duration.

A New Parachute

The Italians have developed a new parachute. The chute employs a single wide belt that encircles the wearer's body, instead of the sling type of harness that is commonly used in the United States. 2362

Forty Millions In Wheat Deal

Ottawa, June 3

About \$40,000,000 in cash will come to the government through the wheat board in connection with the sale of 50,000,000 bushels of wheat announced Saturday.

Saturday the futures market was something over 75 and 77, according to the date of delivery. The price secured on 50,000,000 bushel transaction was around 80 cents a bushel.

This will relieve the situation very considerably, both from the standpoint of stock on hand and the financial end. Further orders are expected before long.

James R. Murray, former head of the wheat board, has been here on an advisory capacity in connection with the sale.

Outbreak of 'Flu Is Anticipated

Baltimore, May 21 (AP)

Another of mankind's insidious enemies—influenza—may be mobilizing its forces before the back-drip of Europe's marching soldiery.

From this assembly of armies said Dr. R. R. Hyde, professor of immunology at the Johns Hopkins medical school, may stem another world-wide outbreak of the dread disease that took hundreds of thousands of lives in 1918.

Dr. Hyde said it did not necessarily follow that a "flu" outbreak would result from concentration of troops, but that records showed such conditions were favorable to its spread.

The Week In Edmonton

EDMONTON, June, Alberta stands at the threshold of the greatest tourist year in her history. In cities, towns, mountain and lake resorts preparations are almost completed for the welcoming, service and pleasing of a huge influx of cash customers whose dollars are to Canada what bombs, planes, and shells are to the fighting men overseas.

These points are stressed because of misguided criticism which the Dominion and Provincial Governments are trying to offset, the criticism deals with the fancied dangers of tourists as an entree for fifth columnists. It is bap-tismism because it does not take into account several factors. These are (1) that the Royal Canadian Mounted Police is still as efficient as ever; (2) that fifth columnists hoping to reach Canada will hardly wait for tourist advertising to tempt them; (3) that opposition to the Canadian tourist trade is exactly in line with the efforts of Nazi agents in U.S.; that Canada vitally needs American dollars. The tourist dollar is the best dollar of all.

As is well known, Canada and

the Mother Country are doing extensive cash — and — carry war business with the United States. The search for the cash is centered largely in the tourist trade. Last year American tourists left \$262,000,000 in Canada. This year it is hoped to induce them to leave \$300,000,000. In normal years, Americans spend half a billion dollars on holidays abroad. This year Canada is 'abroad' European and Near Eastern traffic being stopped. Should Americans leave in Canada this year the amount anticipated, they will have swelled Canada's coffers by half as much again as her entire production of gold.

It has been estimated, too, that for each \$55 incoming tourists one Canadian is gainfully employed by their spending during the length of their stay. The American Hotel Association declares that the tourist's dollar is broken down as follows: Restaurant 18 cents; garage 10 cents; theatres 8 cents; miscellaneous 12 cents. That is a pretty broad spread over the community.
